

ECO 198M Data Management & Visualization

Lecture 1 | In Class Exercise – Connecting to Databases

Step 1 | Download and Install the MySQL Workbench

Proceed to: <https://dev.mysql.com/downloads/workbench/> and download version 6.3.1 of the MySQL Workbench for your operating system (Windows, Mac, etc.) as shown in the following slides. Be sure to click where the red arrows indicate.

Select Version 6.3.10

Click Here

General Availability (GA) Releases

MySQL Workbench 6.3.10

Select Version:

6.3.10

Select Operating System:

Microsoft Windows

Looking for the latest GA version?

Recommended Download:

MySQL Installer for Windows

**All MySQL Products. For All Windows Platforms.
In One Package.**

Starting with MySQL 5.6 the MySQL Installer package replaces the standalone MSI packages.

Windows (x86, 32 & 64-bit), MySQL Installer MSI

MySQL Community Downloads

Login Now or Sign Up for a free account.

An Oracle Web Account provides you with the following advantages:

- Fast access to MySQL software downloads
- Download technical White Papers and Presentations
- Post messages in the MySQL Discussion Forums
- Report and track bugs in the MySQL bug system

Step 2 | Download the UT SSL Certificate File

Go to: <https://systems.webhost.utexas.edu/ca/ca.html>

Download the following file to a new folder in your documents:

[ca-mysqldb02-cert.pem](#)

Step 3 | Setup Connection to Murach Textbook Databases

Open the MySQL Workbench and follow the steps outlined on the following slides to connect to the textbook databases:

Welcome to MySQL Workbench

MySQL Workbench is the official graphical user interface (GUI) tool for MySQL. It allows you to design, create and browse your database schemas, work with database objects and insert data as well as design and run SQL queries to work with stored data. You can also migrate schemas and data from other database vendors to your MySQL database.

Connection Remote Management System Profile

Connection Method: Standard (TCP/IP) Method to use to connect to the RDBMS

Parameters SSL Advanced

Use SSL: If available Turns on SSL encryption. Connection will fail if SSL is not available.

SSL Key File: Path to Client Key file for SSL.

SSL CERT File: Path to Client Certificate file for SSL.

SSL CA File: C:\Users\jpg2847\Documents\UT MySQL\ca Path to Certificate Authority file for SSL.

SSL Cipher: Optional : separated list of permissible ciphers to use for SSL encryption.

SSL Wizard ...

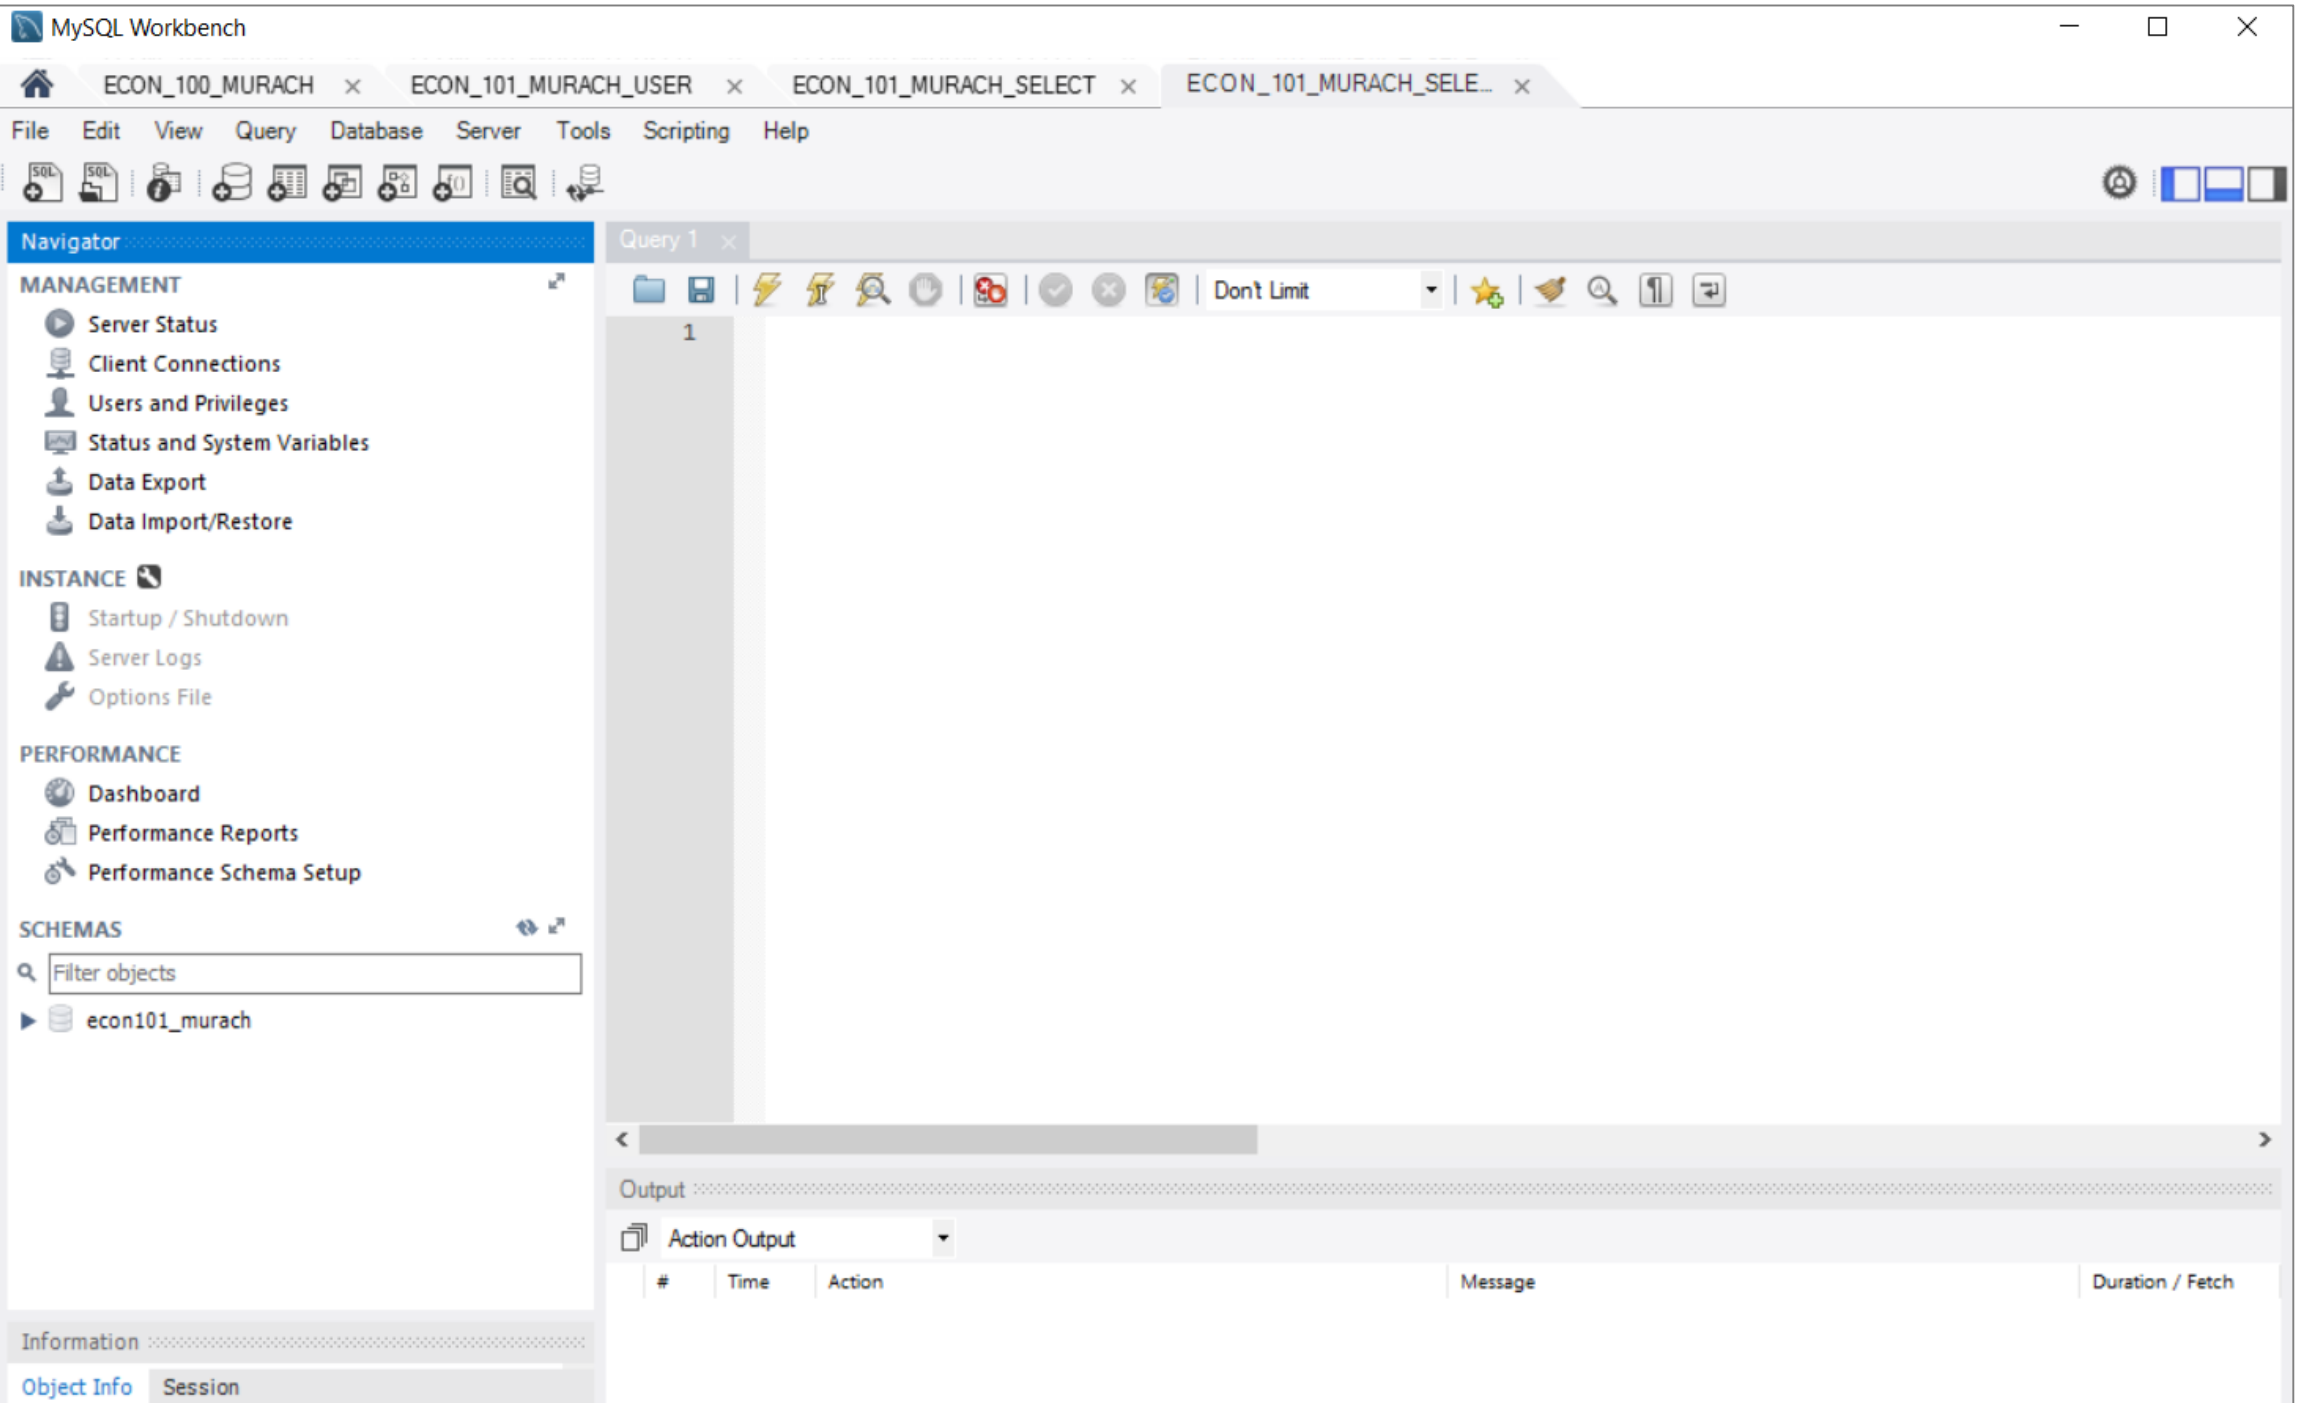

Files ...

New Delete Duplicate Move Up Move Down Test Connection Close

Click on the SSL tab and fill in the file path for the CA file you saved earlier.

Click Test Connection to make sure it works and then click OK.

You should then be able to double click the connection to open it. This will open the MySQL editor as shown on the next slide.

Step 4 | Setup Connection to NorthWind Database

Follow the same steps as above and shown on the next slides to connect to our second course database - NorthWind.

Welcome to MySQL Workbench

MySQL Workbench is the official graphical user interface (GUI) tool for MySQL. It allows you to design, create and browse your database schemas, work with database objects and insert data as well as design and run SQL queries to work with stored data. You can also migrate schemas and data from other database vendors to your MySQL database.

New Delete Duplicate Move Up Move Down Test Connection Close

Click on the SSL tab and fill in the file path for the CA file you saved earlier.

Click Test Connection to make sure it works and then click OK.

You should then be able to double click the connection to open it. This will open the MySQL editor as shown on the next slide.

Congratulations! You should now see both connections on your MySQL homepage:

UT Austin VPN & DUO

As long as you are connecting from a campus network, you should be able to connect to your MySQL databases without issues. If you are on a non-campus network, you will need to establish a VPN connection. To do so, follow the instructions found on:

<https://wikis.utexas.edu/display/engritgpublic/Connecting+to+the+University+of+Texas+VPN>

If you have not setup DUO yet, you will need to do that as well. Instructions for both are at the link above.
